

DUTCH MUSHROOM PROJECT LOCATIONS

The art of growing. That's what it's all about in the mushroom industry. Dutch Mushroom Projects BV designs, builds and supplies all equipment and systems you require to set up this specialized growing process. For this purpose, we use innovative technologies and high-quality materials, customised down to the smallest detail to suit your wishes and local climate situation. It's therefore no surprise that compost yards and/or mushroom farms all over the world have been gratefully using our products and services for many years.

Dutch Mushroom Projects is a highly specialized turn-key supplier to the mushroom industry. Founded in 1981 we're an independent company with a long proven history of supplying quality products and solutions. We're located in the heart of the Dutch Mushroom Industry. If you are considering growing mushrooms or producing compost then you've found the perfect partner!
